6 Literaturverzeichnis

31. Minto CF, Schnider TW, Shafer SL: Pharmacokinetics and pharmacodynamics of remifentanil. II. Model application. Anesthesiology 1997; 86: 24-33

42. Tunstall ME: Awareness, caesarean section and the isolated forearm technique. Anaesthesia 1990; 45: 686

43. Rampil JJ: A primer for EEG signal processing in anesthesia. Anesthesiology 1998; 89: 980-1002

44. Doi M, Gajraj RJ, Mantzaridis H, Kenny GN: Relationship between calculated blood concentration of propofol and electrophysiological variables during emergence from anaesthesia: comparison of bispectral index, spectral edge frequency, median frequency and auditory evoked potential index. Br.J.Anaesth. 1997; 78: 180-4

53. Daunderer M, Schwender D: [Depth of anesthesia, awareness and EEG]. Anaesthesist 2001; 50: 231-41

54. Loughnan BL, Sebel PS, Thomas D, Rutherford CF, Rogers H: Evoked potentials following diazepam or fentanyl. Anaesthesia 1987; 42: 195-8

64. Vereecke HE, Vasquez PM, Jensen EW, Thas O, Vandenbroecke R, Mortier EP, Struys MM: New composite index based on midlatency auditory evoked potential and electroencephalographic parameters to optimize correlation with propofol effect site concentration: comparison with bispectral index and solitary used fast extracting auditory evoked potential index. Anesthesiology 2005; 103: 500-7

70. Kox WJ.: Check-up Anästhesiologie. Heidelberg, Springer-Verlag, 2005

91. Struys M, Versichelen L, Thas O, Herregods L, Rolly G: Comparison of computer-controlled administration of propofol with two manually controlled infusion techniques. Anaesthesia 1997; 52: 41-50

143. Anderson RE, Barr G, Assareh H, Jakobsson J: The AAI index, the BIS index and end-tidal concentration during wash in and wash out of sevoflurane. Anaesthesia 2003; 58: 531-5
