10 Literaturverzeichnis

Akisli I, Ozcan M, Nergiz I.
Resistance of core materials against torsional forces on differently conditioned titanium posts.

Akkayan B.
An in vitro study evaluating the effect of ferrule length on fracture resistance of endodontically treated teeth restored with fiber-reinforced and zirconia dowel systems.

Akkayan B, Gulmez T.
Resistance to fracture of endodontically treated teeth restored with different post systems.

Al-Hazaimeh N, Gutteridge DL.
An in vitro study into the effect of the ferrule preparation on the fracture resistance of crowned teeth incorporating prefabricated post and composite core restorations.

Al-Wazzan KA, Al-Harbi AA, Hammad IA.
The effect of eugenol-containing temporary cement on the bond strength of two resin composite core materials to dentin.

Albakry M, Guazzato M, Swain MV.
Biaxial flexural strength, elastic moduli, and x-ray diffraction characterization of three pressable all-ceramic materials.

Alves J, Walton R, Drake D.
Coronal leakage: endotoxin penetration from mixed bacterial communities through obturated, post-prepared root canals.

Anderson DJ.
Measurement of stress in mastication. I.

Asmussen E.
NMR-analysis of monomers in restorative resins.

Asmussen E, Peutzfeldt A, Heitmann T.
Stiffness, elastic limit, and strength of newer types of endodontic posts.
Assif D, Bitenski A, Pilo R, Oren E.
Effect of post design on resistance to fracture of endodontically treated teeth with complete crowns.

Assif D, Ferber A.
Retention of dowels using a composite resin as a cementing medium.

Assif D, Gorfil C.
Biomechanical considerations in restoring endodontically treated teeth.

Atmadja G, Bryant RW.
Some factors influencing the depth of cure of visible light-activated composite resins.

Atta MO, Smith BG, Brown D.
Bond strengths of three chemical adhesive cements adhered to a nickel-chromium alloy for direct bonded retainers.

Azer SS, Drummond JL, Campbell SD, El Moneim Zaki A.
Influence of core buildup material on the fatigue strength of an all-ceramic crown.

Bachicha WS, Di Fiore PM, Miller DA, Lautenschlager EP, Pashley DH.
Microleakage of endodontically treated teeth restored with posts.

Bailey LF, Bennett RJ.
DICOR surface treatments for enhanced bonding.

Baldissara P, Pieri F, Arcidiacono A.
Fatigue resistance of fiber posts: a comparative study.

Bausch JR, De Lange K, Davidson CL, Peters A, De Gee AJ.
Clinical significance of polymerization shrinkage of composite resins.

Beech DR, Tyas MJ, Solomon A.
Bond strength of restorative materials to human dentin: influence of post-extraction time.
Behr M, Hindelang U, Rosentritt M, Lang R, Handel G.  
Comparison of failure rates of adhesive-fixed partial dentures for in vivo and in vitro studies.  

Ben-Amar A, Gontar G, Fitzig S, Urstein M, Liberman R.  
Retention of prefabricated posts with dental adhesive and composite.  

Ben-Ur Z, Zimmermann AM.  
Screw-type root canal post systems - accuracy and strength of root canal walls.  
Quintessenz 1983; 34:1325-32.

Blunck U, Haller B.  
Klassifikation von Bondingsystemen.  

Bolhuis HPB, De Gee AJ, Feilzer AJ, Davidson CL.  
Fracture strength of different core build-up designs.  

Boone KJ, Murchison DF, Schindler WG, Walker WA, 3rd.  
Post retention: the effect of sequence of post-space preparation, cementation time, and different sealers.  

Bowen RL.  
Compatibility of various materials with oral tissues. I: The components in composite restorations.  

Bullard RH, Leinfelder KF, Russell CM.  
Effect of coefficient of thermal expansion on microleakage.  

Buonocore M.  
Adhesive sealing of pits and fissures for caries prevention, with use of ultraviolet light.  

Buonocore MG, Wileman W, Brudevold FA.  
A report on a resin composite capable of bonding to human dentin surfaces.  

Burke F, Watts D.  
Fracture resistance of teeth restored with dentin-bonded crowns.  
Burns DA, Krause WR, Douglas HB, Burns DR.
Stress distribution surrounding endodontic posts.

Butz F, Lennon AM, Heydecke G, Strub JR.

Biomechanics in clinical dentistry. 1 Edition.
Quintessenz, Chicago.

Caputo AA, Hokama SN.
Stress and retention properties of a new threaded endodontic post.

Cathro PR, Chandler NP, Hood JA.
Impact resistance of crowned endodontically treated central incisors with internal composite cores.

Caughman WF, O'Connor RP, Williams HA, Rueggeberg FA.
Retention strengths of three cements using full crown preparations restored with amalgam.

Chailertvanitkul P, Saunders WP, Mackenzie D.
An assessment of microbial coronal leakage in teeth root filled with gutta-percha and three different sealers.

Chan FW, Harcourt JK, Brockhurst PJ.
The effect of post adaptation in the root canal on retention of posts cemented with various cements.

Chang JC, Powers JM, Hart D.
Bond strength of composite to alloy treated with bonding systems.

Chen HY, Hickel R, Setcos JC, Kunzelmann KH.
Effects of surface finish and fatigue testing on the fracture strength of CAD-CAM and pressed-ceramic crowns.

Christensen GJ.
Posts and cores: state of the art.
Cobankara FK, Ungor M, Belli S.
The effect of two different root canal sealers and smear layer on resistance to root fracture.

Coca I, Schwickerath H.
Stress distribution in crowns in the anterior region.

Cohen BI, Condos S, Deutsch AS, Musikant BL.
Fracture strength of three different core materials in combination with three different endodontic posts.

Cohen BI, Deutsch AS, Musikant BL.
Cyclic fatigue testing of six endodontic post systems.

Cohen BI, Pagnillo MK, Condos S, Deutsch AS.
Four different core materials measured for fracture strength in combination with five different designs of endodontic posts.

Cormier CJ, Burns DR, Moon P.
In vitro comparison of the fracture resistance and failure mode of fiber, ceramic, and conventional post systems at various stages of restoration.

Creugers NH, Mentink AG, Kayser AF.
An analysis of durability data on post and core restorations.

Crim GA, Swartz ML, Phillips RW.
Comparison of four thermocycling techniques.

Dallari A, Rovatti L.
Six years of in vitro/in vivo experience with Composipost.

De Rijk WG.
Removal of fiber posts from endodontically treated teeth.

Dean JP, Jeansson BG, Sarkar N.
In vitro evaluation of a carbon fiber post.
DeLong R, Douglas WH.
Development of an artificial oral environment for the testing of dental restoratives: bi-axial force and movement control.

DeLong R, Sakaguchi RL, Douglas WH, Pintado MR.
The wear of dental amalgam in an artificial mouth: a clinical correlation.

Dietschi D, Romelli M, Goretti A.
Adaptation of adhesive posts and cores to dentin after fatigue testing.

Douglas WH, Sakaguchi RL, DeLong R.
Frictional effects between natural teeth in an artificial mouth.

Doyle MG, Goodacre CJ, Munoz CA, Andres CJ.
The effect of tooth preparation design on the breaking strength of Dicor crowns: 3.

Drummond JL.
In vitro evaluation of endodontic posts.
Am J Dent 2000; 13:5B-8B.

Drummond JL, King TJ, Bapna MS, Koperski RD.
Mechanical property evaluation of pressable restorative ceramics.

Drummond JL, Toepke TR, King TJ.
Thermal and cyclic loading of endodontic posts.

Duret B, Reynaud M, Duret F.
New concept of coronoradicular reconstruction: the Composipost (1).
Chir Dent Fr 1990; 60:131-41 contd.

Eckerbom M, Magnusson T, Martinsson T.
Reasons for and incidence of tooth mortality in a Swedish population.

Edelhoff D, Spiekermann H, Yildirim M.
Klinische Erfahrungen mit konfektionierten Wurzelstiften und individuellen Stumpfauf- bauten aus Keramik.

Eichner K.
Messung der Kräfte bei Kauvorgängen.

El-Mowafy OM, Rubo MH, El-Badrawy WA. 
Hardening of new resin cements cured through a ceramic inlay. 
Oper Dent 1999; 24:38-44.

Farik B, Munksgaard EC. 
Fracture strength of intact and fragment-bonded teeth at various velocities of the applied force. 

Feilzer AJ, De Gee AJ, Davidson CL. 
Setting stresses in composites for two different curing modes. 

Felton DA, Webb EL, Kanoy BE, Dugoni J. 
Threaded endodontic dowels: effect of post design on incidence of root fracture. 

Fennis WM, Kuijs RH, Kreulen CM. 
A survey of cusp fractures in a population of general dental practices. 

Ferrari M, Mannocci F, Mason PN, Kugel G. 
In vitro leakage of resin-bonded all-porcelain crowns. 

Ferrari M, Mannocci F, Vichi A, Cagidiaco MC, Mjor IA. 
Bonding to root canal: structural characteristics of the substrate. 

Ferrari M, Mannocci F, Vichi A, Goracci G. 
Bond strengths of a porcelain material to different abutment substrates. 
Oper Dent 2000b; 25:299-305.

Ferrari M, Scotti R, 2002b. 
Chapter 4: Composition, microstructure and morphology of posts. In: Fiber Posts. 

Ferrari M, Scotti R, 2002c. 
Chapter 4: Composition, microstructure and morphology of posts. In: Fiber Posts. 
Ferrari M, Scotti R, 2002d. 

Ferrari M, Vichi A, Garcia-Godoy F. 
Clinical evaluation of fiber-reinforced epoxy resin posts and cast post and cores. 
Am J Dent 2000c; 13:15B-18B.

Ferrari M, Vichi A, Grandini S. 
Efficacy of different adhesive techniques on bonding to root canal walls: an SEM investigation. 

Ferrari M, Vichi A, Grandini S, Goracci C. 
Efficacy of a self-curing adhesive-resin cement system on luting glass-fiber posts into root canals: an SEM investigation. 

Finger WJ, Ahlstrand WM, Fritz UB.
Radiopacity of fiber-reinforced resin posts. 

Fischer H, Edelhoff D, Marx R.
Beanspruchbarkeit von Zirkonoxid-Wurzelstiften. 

Fischer H, Marx R.
Fracture toughness of dental ceramics: comparison of bending and indentation method. 

Fokkinga WA, Kreulen CM, Vallittu PK, Creugers NH.
A structured analysis of in vitro failure loads and failure modes of fiber, metal, and ceramic post-and-core systems. 

Fouchard P.
The surgeon dentist. 
2 th ed, ButterWorth, London 1743;

Fradeani M.
The application of all-ceramic restorations in the anterior and posterior regions. 

Fradeani M, Redemagni M.
An 11-year clinical evaluation of leucite-reinforced glass-ceramic crowns: a retrospective study. 
Franchi M, Breschi L.
Effects of acid-etching solutions on human enamel and dentin.

Freedman G.
The carbon fibre post: metal-free, post-endodontic rehabilitation.

Friedlander LD, Munoz CA, Goodacre CJ, Doyle MG, Moore BK.

Friedman M, Hassan R.
Comparison study of visible curing lights and hardness of light-cured restorative materials.

Fusayama T, Maeda T.
Effect of pulpectomy on dentin hardness.

Gegauff AG.
Effect of crown lengthening and ferrule placement on static load failure of cemented cast post-cores and crowns.

Giachetti L, Scaminaci Russo D, Bertini F, Giuliani V.
Translucent fiber post cementation using a light-curing adhesive/composite system: SEM analysis and pull-out test.

Goodacre CJ, Bernal G, Rungcharassaeng K, Kan JY.
Clinical complications in fixed prosthodontics.

Goodacre CJ, Spolnik KJ.

Gorman CM, McDevitt WE, Hill RG.
Comparison of two heat-pressed all-ceramic dental materials.

Goto Y, Nicholls JI, Phillips KM, Junge T.
Fatigue resistance of endodontically treated teeth restored with three dowel-and-core systems.
Gräf W.
Die thermische Belastung der Zähne beim Verzehr extrem heißer und kalter Speisen.
Dtsch Zahnärztl Z 1960; 15:30-34.

Grandini S, Goracci C, Monticelli F, Tay FR, Ferrari M.
Fatigue resistance and structural characteristics of fiber posts: three-point bending test and SEM evaluation.

Gutmann JL.
The dentin-root complex: anatomic and biologic considerations in restoring endodontically treated teeth.

Hagge MS, Lindemuth JS.
Effect of thermocycling on the fracture strength of intact third molars stored for two different time periods.

Hagge MS, Wong RD, Lindemuth JS.
Effect of three root canal sealers on the retentive strength of endodontic posts luted with a resin cement.

Hagge MS, Wong RD, Lindemuth JS.
Retention strengths of five luting cements on prefabricated dowels after root canal obturation with a zinc oxide/eugenol sealer: 1. Dowel space preparation/cementation at one week after obturation.

Hahn R.
Vollkeramische Einzelzahnrestaurationen.
Habilitationsschrift 1994;

Haller B.
Aktueller Stand der Komposit-Dentinhaftung.

Haller B, Klaiber B, Dürner U, Hofmann N.
Dentinpermeabilität nach Behandlung mit Cleanern und Primern.

Hansen EK, Asmussen E, Christiansen NC.
In vivo fractures of endodontically treated posterior teeth restored with amalgam.
Hayakawa T, Horie K, Aida M.
The influence of surface conditions and silane agents on the bond of resin to dental porcelain.

Helfer AR, Melnick S, Schilder H.
Determination of the moisture content of vital and pulpless teeth.

Helkimo E, Ingervall B.
Bite force and functional state of the masticatory system in young men.

Heydecke G, Butz F, Hussein A, Strub JR.
Fracture strength after dynamic loading of endodontically treated teeth restored with different post-and-core systems.

Heydecke G, Butz F, Strub JR.
Einfuß des endodontischen Aufbaus auf die Frakturfestigkeit überkronter Frontzähne.

Heydecke G, Butz F, Strub JR.
Fracture strength and survival rate of endodontically treated maxillary incisors with approximal cavities after restoration with different post and core systems: an in-vitro study.

Heydecke G, Peters MC.
The restoration of endodontically treated, single-rooted teeth with cast or direct posts and cores: a systematic review.

Hu YH, Pang LC, Hsu CC, Lau YH.
Fracture resistance of endodontically treated anterior teeth restored with four post-and-core systems.

Huang TJ, Schilder H, Nathanson D.
Effects of moisture content and endodontic treatment on some mechanical properties of human dentin.

Hugo B, Lussi A, Hotz P.
The preparation of enamel margin beveling in proximal cavities.

Hunter AJ, Feiglin B, Williams JF.
Effects of post placement on endodontically treated teeth.
Ichikawa Y, Akagawa Y, Nikai H, Tsuru H. 
Tissue compatibility and stability of a new zirconia ceramic in vivo. 

Isidor F, Brondum K. 
Intermittent loading of teeth with tapered, individually cast or prefabricated, parallel-sided posts. 

Isidor F, Odman P, Brondum K. 
Intermittent loading of teeth restored using prefabricated carbon fiber posts. 

Janda R. 
Der Stand der Entwicklung auf dem Gebiet der Zahnfüllungsstoffe (I).

Impact fracture characteristics of intact and crowned human central incisors.  

Strand GV, Tveit AB, Eide GE.  
Cavity design and dimensions of tunnel preparations versus composite resin Class-II preparations.  

Strub JR, Beschnitt SM.  
Fracture strength of 5 different all-ceramic crown systems.  
Strub JR, Pontius O, Koutayas S.
Survival rate and fracture strength of incisors restored with different post and core sys-
tems after exposure in the artificial mouth.

Tjan AH, Nemetc H.
Effect of eugenol-containing endodontic sealer on retention of prefabricated posts luted
with adhesive composite resin cement.
Quintessence Int 1992; 23:839-44.

Tjan AH, Whang SB.
Resistance to root fracture of dowel channels with various thicknesses of buccal dentin
walls.

Torbjörner A, Karlsson S, Odman PA.
Survival rate and failure characteristics for two post designs.

Tronstad L, Asbjornsen K, Doving L, Pedersen I, Eriksen HM.
Influence of coronal restorations on the periapical health of endodontically treated teeth.

Trope M, Maltz DO, Tronstad L.
Resistance to fracture of restored endodontically treated teeth.

Turner CH.
Post-retained crown failure: a survey.

Utter JD, Wong BH, Miller BH.
The effect of cementing procedures on retention of prefabricated metal posts.

Vallittu PK.
A review of fiber-reinforced denture base resins.

Vallittu PK, Lassila VP, Lappalainen R.
Acrylic resin-fiber composite--Part I: The effect of fiber concentration on fracture resis-
tance.

Varela SG, Rabade LB, Lombardero PR.
In vitro study of endodontic post cementation protocols that use resin cements.
Vichi A, Ferrari M, Davidson CL.
Influence of ceramic and cement thickness on the masking of various types of opaque posts.

Vichi A, Grandini S, Davidson CL, Ferrari M.
An SEM evaluation of several adhesive systems used for bonding fiber posts under clinical conditions.

Vire DE.
Failure of endodontically treated teeth: classification and evaluation.

Voss R.
Die Festigkeit metallkeramischer Kronen.

Walton TR.
A 10-year longitudinal study of fixed prosthodontics: clinical characteristics and outcome of single-unit metal-ceramic crowns.

Wegmann U, Grüner M.
Die Stabilität von Wurzelstiften im Wechsellastversuch.

Willems G, Lambrechts P, Braem M, Vanherle G.
Composite resins in the 21st century.

Wiskott HW, Nicholls JI, Belser UC.
Stress fatigue: basic principles and prosthodontic implications.
Int J Prosthodont 1995; 8:105-16.

Wiskott HW, Nicholls JI, Belser UC.
The effect of tooth preparation height and diameter on the resistance of complete crowns to fatigue loading.

Wolanek GA, Loushine RJ, Weller RN, Kimbrough WF, Volkman KR.
In vitro bacterial penetration of endodontically treated teeth coronally sealed with a dentin bonding agent.

Xu HH, Kelly JR, Jahanmir S, Thompson VP, Rekow ED.
Enamel subsurface damage due to tooth preparation with diamonds.
